## SECTION 01

# System Architecture & The 4–Screen Real–Time Floor

How real-time WebSockets connect every terminal in under 200 milliseconds.

### ⚡ The 4 Synchronized Screens of Sweta's Restaurant

During peak dinner rush at Sweta's Restaurant, orders move effortlessly through four synchronized terminals. When a guest orders a woodfired pizza on their phone at Table 04, the ticket appears simultaneously on the Kitchen display screen, the waiter's phone chimes, and the table turns green on the cashier counter.

#### 1. Table QR

Guest scans acrylic standee, browses photos & orders.

#### 2. Kitchen KDS

Color-coded tickets with live cooking countdowns.

#### 3. Waiter Phone

Table-side punches, custom mods & ready chimes.

#### 4. Cashier POS

80mm thermal bills, UPI QR pay & anti-theft queue.

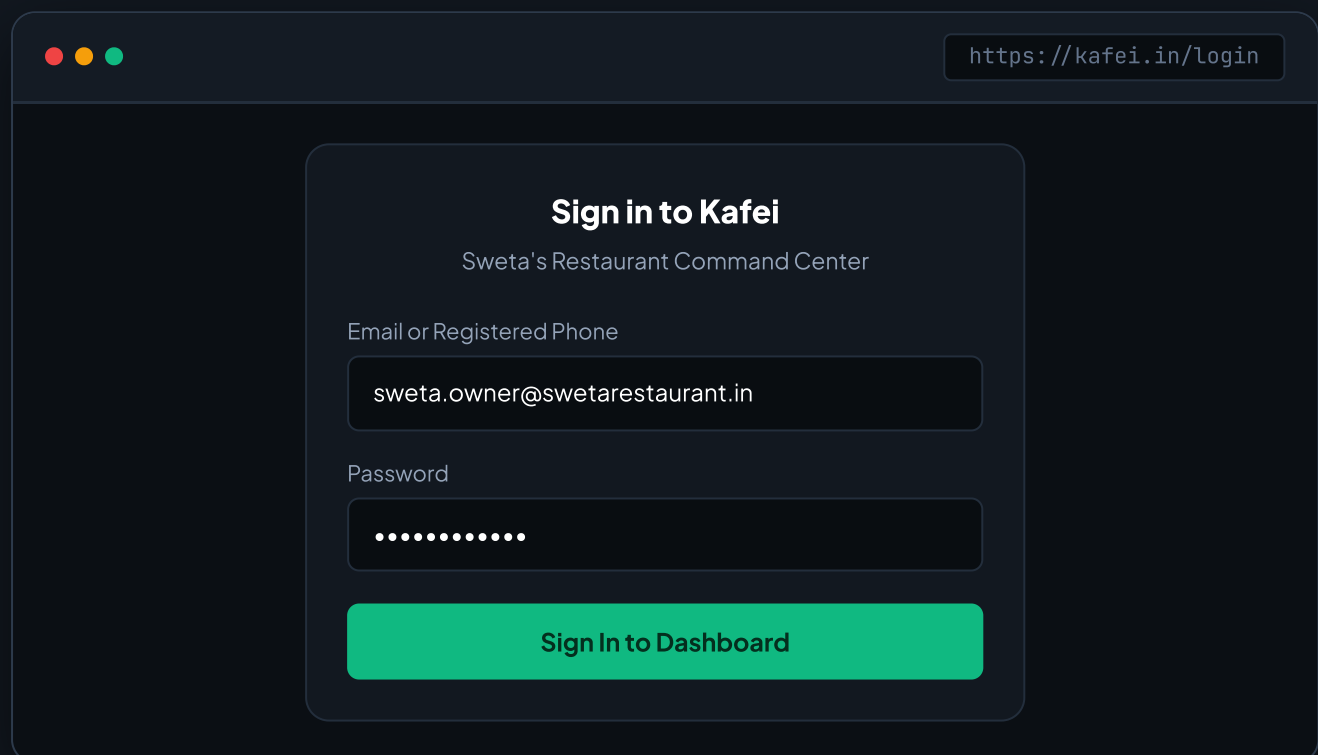

## SECTION 02

# Authentication, Secure Onboarding & Session Control

Enterprise-grade multi-tenant security with JWT token cookies and password recovery.

### Live Login & Multi-Tenant Onboarding Screens

Sweta's Restaurant administrators access their private tenant environment securely via email/phone OTP and encrypted JWT sessions.

The screenshot shows a web browser window with the address bar displaying `https://kafei.in/login`. The main content area features a dark-themed login form titled "Sign in to Kafei" with the subtitle "Sweta's Restaurant Command Center". The form includes two input fields: "Email or Registered Phone" containing the text `sweta.owner@swetarestaurant.in`, and "Password" represented by a series of dots. Below the inputs is a large orange button labeled "Sign In to Dashboard".

## SECTION 03

# Multi-Branch Outlets & Dining Area Setup

Managing the Sundarban Flagship and Teliamura branch from a single login.

### Sweta's Restaurant Multi-Outlet Structure

Sweta manages two physical locations. Revenue, inventory, and staff are partitioned cleanly per branch while rolling up into one centralized owner overview.
