Subscriptions

1 Restaurant Owner: Setup, Menu & Dashboard

Everything you need to launch and monitor your restaurant in 6 fast steps.

1

Sign Up & Restaurant Profile (`/onboarding`)

Register your account with your restaurant name and email. Choose your dining concept (e.g. *Fine Dining, Cafe*) and verify currency (INR ₹).

What You See: Guided 6-step progress bar showing 0% to 100% setup completion.

2

Setup Floor Dining Areas & Table QR Codes (`/tables`)

Define your dining sections (e.g. *Courtyard, AC Hall, Rooftop*) and set table count. Atlas automatically generates encrypted QR codes for each table.

What You See: Downloadable QR sticker designs ready for printing on table stands.

3

Menu Engineering & Dish Management (`/menus`)

Create categories (*Starters, Biryanis, Drinks*), add dish photos, set prices, and dietary flags (Veg ●, Non-Veg ●). Toggle "Out of Stock" with 1 click!

What You See: Clean visual card grid with instant live sync to all diner phones.

4

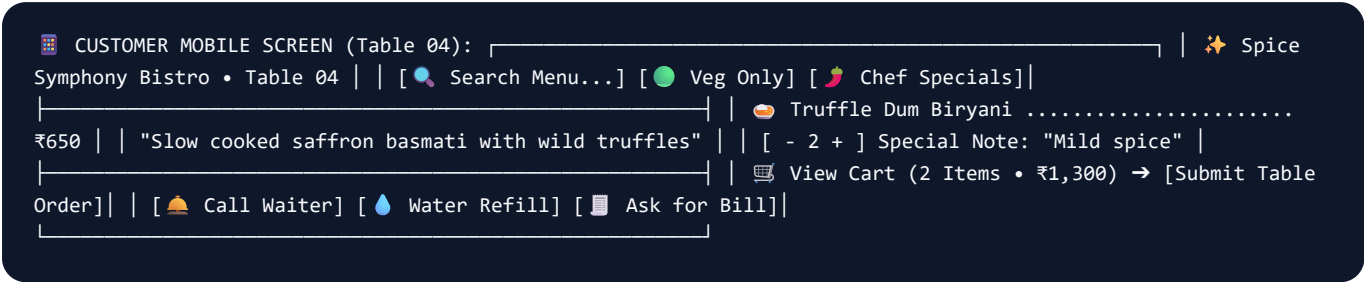

Live Operations Dashboard & AI Copilot (`/dashboard`)

Monitor real-time sales revenue, occupied tables, and peak dining hours. Ask the AI Copilot natural questions: "Which dish made the most profit today?"

What You See: Live revenue stats, occupancy meters, hourly heatmaps, and AI chat.

2 Customer / Diner Flow: Zero App Download

Frictionless digital ordering directly inside mobile web browsers.

1

Scan QR Sticker on Table

Customer opens phone camera, scans the table code, and the live interactive menu opens instantly without downloading an app or registering.

2

Select Dishes & Shared Table Cart

Diners add dishes, choose portion sizes, specify chef notes (e.g. "Extra sauce, no nuts"), and tap "Submit Table Order".

3

Live Prep Tracking & Table Service Calls

The screen shows live progress (*Pending* → *Cooking* → *Ready*). Diners can tap "Call Waiter" or "Water Refill" at any moment.

3 Kitchen Chef Flow: Live KDS Touchscreen (`/kitchen`)

Real-time order ticket workflow for chefs and kitchen line cooks.

 KITCHEN KDS TOUCHSCREEN:

NEW ORDERS (1)

PREPARING (2)

READY FOR PICKUP (1)

Table 04 • #AT-000001 | Table 02 • Timer: 4m | Table 01 • #AT-000003 | | • 2x Truffle Biryani | • 1x Butter Chicken | • 2x Cold Coffee | | ⚠ Note: "Mild spice" | • 2x Garlic Naan | [WAITSTAFF NOTIFIED] | | [START COOKING →] | [MARK AS READY →] | [Completed ✓] |

1 Order Arrives (Audio Alert)

Chime rings and the new ticket appears under **"New Orders"** with table number, quantities, and highlighted chef notes.

2 Start Cooking → Ready for Pickup

Cook taps **"Start Cooking"** (timer starts). When plated, cook taps **"Ready for Pickup"**. Floor waitstaff are notified immediately!

4 Floor Waitstaff & Cashier Billing

Floor Waiter Flow (`/waiter`)

- **Food Delivery:** See pulsing green alerts when kitchen finishes cooking. Pick up hot food and tap *"Mark Served"*.
- **Table Calls:** Real-time badges for customer requests (*Water, Waiter, Bill*).
- **Manual Ordering:** Take orders for walk-ins on mobile phone and send directly to kitchen.

Cashier & POS Settlement (`/cashier`)

- **Review Bill:** Select table, review ordered items, and verify automatic taxes (CGST/SGST).
- **Apply Discounts:** Enter promo codes or percentage discounts.
- **Accept Payment:** Collect via Cash (with change calculator), Dynamic UPI QR, or Card POS machine.
- **Close Table:** Generates printed receipt and automatically frees up the table for the next diners!

5 Platform Admin Flow (`/platform-admin`)

Central management desk for Atlas operators and engineers.

Global Network & Support Incident Desk

- **Platform Overview:** Total active restaurants, network revenue (MRR), and system health.
- **Customer Support Desk:** Manage tickets submitted by restaurant owners (e.g. ATLAS-0FB5). Type resolution notes and resolve incidents.
- **Subscription Controls:** Upgrade restaurants between Free, Growth, and Multi-Branch Enterprise tiers.

6 Frequently Asked Questions (FAQ)

Q: Can customers order if they don't have mobile internet?

Yes! The waiter can take their order directly on the handheld waiter screen (`/waiter`).

Q: How fast do menu price changes update?

Instantly! When you edit a price in `/menus`, all customer phone screens update immediately without reloading.

Q: How do I get help if my kitchen printer stops working?

Click **"Support"** in your sidebar and click **"+ Create Ticket"**. Atlas engineers receive your ticket with priority SLA!
