

 Kafei 2.0 — Restaurant Billing Software & Floor Operations Platform

Commercial Client Product Brochure & System Guide

Official Portal: <https://kafei.in> | Direct Sales: +91 9903085026 | Support: restaurant.kafei@gmail.com

Headquarters: Sundarban, West Bengal & Teliamura, Tripura, India

1. Executive Summary

Kafei 2.0 is an all-in-one cloud restaurant billing software, point-of-sale (POS) system, and floor management platform designed for cafes, fine-dining rooms, bars, quick-service restaurants (QSR), and multi-outlet chains.

The Core Promise:

"Nothing gets lost between the table, the kitchen, and the counter."

Traditional restaurant software requires buying ₹50,000–₹1,50,000 in bulky proprietary POS machines, pays 3rd-party aggregators high commission cuts, and causes service chaos with lost paper tickets. **Kafei runs completely over the web** on any existing iPad, Android tablet, laptop, standard 80mm thermal receipt printer, or smartphone.

2. Key Numbers at a Glance

Metric	Kafei 2.0 Performance
Active Screens per Order	4 synchronized screens (Table QR, Kitchen KDS, Waiter Handheld, Cashier POS)
Customer App Downloads	0 required (Opens instantly in Safari/Chrome)
Sales Commission	0% flat (Keep 100% of your revenue)
Receipt Compatibility	80mm & 58mm standard thermal printers (USB, Bluetooth, LAN)
Setup Time	5 minutes (Instant browser onboarding)
Free Trial	14 days full access (No credit card needed)

3. The 4-Screen Unified Floor Architecture

Screen 1: The Guest Table (App-Free QR Standee)

- **Zero App Download:** Guests scan the table acrylic standee with their native phone camera.
- **Visual Menu & Customization:** High-resolution dish photos, dietary badges (Veg/Non-Veg/Vegan), portion sizes, and cooking notes.
- **Live Cooking Timer:** Once the kitchen accepts the ticket, a live countdown shows when food is arriving.
- **0% Commission UPI Checkout:** Guests view the bill total alongside your restaurant's UPI QR code.

Screen 2: The Kitchen Display System (KDS)

- **Paperless Digital KOT:** Eliminates greasy lost tickets and printer jams.
- **Color-Coded Timers:** Tickets shift from Green (Fresh) → Yellow (In-progress) → Red (Delayed).
- **Allergen & Modifier Highlights:** Special requests ("No onions", "Extra cheese") appear in bold amber callouts.
- **Bump Bar Completion:** 1-tap marks dishes ready, automatically alerting floor staff.

Screen 3: The Waiter Mobile Handheld Terminal

- **Staff Phone Compatibility:** Waiters carry their own smartphones or light Android tablets.
- **Table-Side Ordering:** Take verbal orders, modify active tables, and transfer tables.
- **Real-Time Floor Sync:** Clears table state the moment billing settles so tables can be reseated immediately.

Screen 4: The Cashier POS & Owner Command Center

- **Ultra-Fast Thermal Billing:** Prints 80mm & 58mm GST-compliant thermal receipts directly from the web browser.
- **Multi-Mode Settlement:** Seamlessly supports UPI QR, Cash, Card, and split billing across guests.

- **Anti-Theft Manager Audit Trail:** Waiters cannot quietly cancel orders. All voids and refunds require an explanatory reason and 1-click manager approval.
- **Recipe-Level Inventory Tracking:** Ingredients deduct as dishes leave the kitchen pass, not at midnight.

4. Step-by-Step Dinner Service Flow

1. **Step 1: Scan & Browse:** Guest sits down at Table 04 and scans the QR standee. The menu opens with photos.
2. **Step 2: Instant Kitchen Routing:** Guest hits "Order". Ticket #AT-0041 flashes on the Kitchen KDS screen. Chef taps "Start Cooking".
3. **Step 3: Plated & Served:** Chef finishes plating and taps "Ready". Waiter terminal receives a chime to serve hot food.
4. **Step 4: 0% Commission Checkout:** Guest views bill on phone or walks to counter. Cashier prints 80mm thermal receipt with GST breakdown. Table resets for next guest.

5. Why Kafei Beats Legacy POS Systems

Capability	Kafei 2.0 Platform	Legacy POS (Petpooja / Posist / Offline)
Hardware Costs	₹0 (Runs on existing tablets/phones)	₹50,000–₹1,50,000 proprietary machines
Sales Commission	0% Flat (No cut on sales)	Hidden transaction cuts & setup fees
Table QR Ordering	Included (Zero guest app installs)	Expensive add-on module
Kitchen Display (KDS)	Included & color-coded	₹5,000+ per kitchen screen
Receipt Printing	80mm & 58mm from browser	Requires local desktop drivers
Anti-Theft Security	Mandatory reason + manager approval queue	Easy staff override
Multi-Branch Sync	Instant cloud dashboard	Offline sync delays
Setup Time	5 minutes online	2 to 5 days technician visit
